

5. Algebra 1: Statistics																										
Study Guide		MRS. WILSON																								
<p>1) What is the interquartile range and range of the data represented on the plot below?</p>  <p style="margin-left: 20px;"> <math>IQR = 7th - 1st = 8 - 5 = 3</math>  <math>Range = Max - min = 10 - 2 = 8</math> </p>	<p>2) How many females do not grocery shop? <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">37</span></p> <table border="1" style="width: 100%; border-collapse: collapse; text-align: center;"> <caption>Do you Shop for Groceries at least Once a Week?</caption> <thead> <tr> <th>Gender</th> <th>Yes</th> <th>No</th> <th>Total</th> </tr> </thead> <tbody> <tr> <td>Male</td> <td>78</td> <td>11</td> <td>89</td> </tr> <tr> <td>Female</td> <td>54</td> <td>37</td> <td>91</td> </tr> <tr> <td>Total</td> <td>132</td> <td>48</td> <td>180</td> </tr> </tbody> </table>	Gender	Yes	No	Total	Male	78	11	89	Female	54	37	91	Total	132	48	180									
Gender	Yes	No	Total																							
Male	78	11	89																							
Female	54	37	91																							
Total	132	48	180																							
<p>3) What is the outlier of the following set of data?</p> <p style="margin-left: 40px;">-6, 1, 6, -5, 0, -35, -2?</p> <p style="margin-left: 40px; color: red; font-size: 1.2em;">- 35</p>																										
<p>4) The following table shows data on the number of pet students have from four classes.</p> <p>Use the dot plots below to determine which data set is Normally Distributed.</p> <p style="margin-left: 20px; color: blue; font-size: 1.2em;"><u>DO</u> BCD</p> <table border="1" style="width: 100%; border-collapse: collapse; text-align: center;"> <thead> <tr> <th></th> <th>A</th> <th>B</th> <th>C</th> <th>D</th> </tr> </thead> <tbody> <tr> <td>A</td> <td>5 4 3 2 1 1 1 1 1</td> <td></td> <td></td> <td></td> </tr> <tr> <td>B</td> <td></td> <td>3 5 3 5 4 2 5 2 1</td> <td></td> <td></td> </tr> <tr> <td>C</td> <td></td> <td></td> <td>3 5 3 3 4 2 4 2 1</td> <td></td> </tr> <tr> <td>D</td> <td></td> <td></td> <td></td> <td>1 5 3 1 4 2 4 2 1</td> </tr> </tbody> </table>		A	B	C	D	A	5 4 3 2 1 1 1 1 1				B		3 5 3 5 4 2 5 2 1			C			3 5 3 3 4 2 4 2 1		D				1 5 3 1 4 2 4 2 1	<div style="margin-bottom: 10px;"> <span style="border: 1px solid black; border-radius: 50%; padding: 5px; font-size: 1.5em;">A</span>  <span style="margin-left: 10px; font-size: 1.5em;">NO</span> </div> <div style="margin-bottom: 10px;"> <span style="font-size: 1.5em;">B</span>  </div> <div style="margin-bottom: 10px;"> <span style="font-size: 1.5em;">C</span>  </div> <div> <span style="font-size: 1.5em;">D</span>  </div>
	A	B	C	D																						
A	5 4 3 2 1 1 1 1 1																									
B		3 5 3 5 4 2 5 2 1																								
C			3 5 3 3 4 2 4 2 1																							
D				1 5 3 1 4 2 4 2 1																						
<p>5) What is the conditional relative frequency that a student's favorite sport is not soccer, given that the student is a boy?</p> <table border="1" style="width: 100%; border-collapse: collapse; text-align: center;"> <thead> <tr> <th></th> <th>Prefer Soccer</th> <th>Do not Prefer Soccer</th> <th>Total</th> </tr> </thead> <tbody> <tr> <td>Boys</td> <td>28</td> <td>12</td> <td>40</td> </tr> <tr> <td>Girls</td> <td>19</td> <td>31</td> <td>50</td> </tr> <tr> <td>Total</td> <td>47</td> <td>43</td> <td>90</td> </tr> </tbody> </table> <table border="1" style="width: 100%; border-collapse: collapse; text-align: center; margin-top: 10px;"> <tbody> <tr> <td>A</td> <td>13% of all boys do not prefer soccer.</td> </tr> <tr> <td><span style="border: 1px solid black; border-radius: 50%; padding: 2px;">B</span></td> <td>30% of all boys do not prefer soccer.</td> </tr> <tr> <td>C</td> <td>27.5% of all boys do not prefer soccer.</td> </tr> <tr> <td>D</td> <td>25.5% of all boys do not prefer soccer.</td> </tr> </tbody> </table> <p style="margin-left: 40px; color: blue; font-size: 1.2em;"><math>\frac{12}{40} \times 100 = 30\%</math></p>				Prefer Soccer	Do not Prefer Soccer	Total	Boys	28	12	40	Girls	19	31	50	Total	47	43	90	A	13% of all boys do not prefer soccer.	<span style="border: 1px solid black; border-radius: 50%; padding: 2px;">B</span>	30% of all boys do not prefer soccer.	C	27.5% of all boys do not prefer soccer.	D	25.5% of all boys do not prefer soccer.
	Prefer Soccer	Do not Prefer Soccer	Total																							
Boys	28	12	40																							
Girls	19	31	50																							
Total	47	43	90																							
A	13% of all boys do not prefer soccer.																									
<span style="border: 1px solid black; border-radius: 50%; padding: 2px;">B</span>	30% of all boys do not prefer soccer.																									
C	27.5% of all boys do not prefer soccer.																									
D	25.5% of all boys do not prefer soccer.

6) What is the mean, median and mode of the data set?  $\{-6, -5, -4, 7, 9, 9, 10, 11, 14\}$ ?

$$\text{mean} = \frac{45}{9} = 5$$

$$\text{median} = 9$$

$$\text{mode} = 9$$

7) The dot plot below to answer the question below.

Ralph's test scores

How many students earned a score of 90 or better?

$$4 + 2 = 6$$

8) The masses (in grams) of pennies are Normally Distributed with a mean of 2.60 g and a standard deviation of 0.03 g.

Find the probability that a penny chosen at random has a mass of 2.57g and 2.66g?

$$34 + 34 + 13.5 = 81.5\%$$

9) Refer to the histogram below.

How many number of board of directors are 60 years or older?

$$5 + 2 = 7$$

60 years old OR older

10) A large group of students took a test in Physics and the final grades have a mean score of 65 and a standard deviation of 15.

If we can approximate the distribution of these grades by a normal distribution, what percent of the students scored between 50 and 80?

$$34 + 34 = 68\%$$
