Part II: Performance Task

Directions: Farmer Bob is planting a garden this spring. He wants to plant squash, pumpkins, corn, beans and potatoes. His plan for the field layout in feet is shown in the figure below. Use the figure and your knowledge of polynomials, perimeter and area to solve the following.

1. expression that represents the ^{Perimeter of} East side of the field.

$$P_E = xy + 1 + x + 6 \quad P = xy + x + 7$$

2. Write a polynomial expression that represents the perimeter of the potato field. Simplify the polynomial expression that represents the perimeter of the potato field.

$$\begin{aligned} P_{\text{potato}} &= 2L + 2W \\ &= 2(x^2 - 7x + 12) + 2(x + 6) \\ &= 2x^2 - 14x + 24 + 2x + 12 \end{aligned}$$

$$P = 2x^2 - 12x + 36$$

3. Write a polynomial expression that represents the area of the squash field. Simplify the polynomial expression that represents the area of the squash field.

$$\begin{aligned} A_{\text{SQUASH}} &= L W \\ A &= (y)(4x) = 4xy \end{aligned}$$

4. Write and simplify the polynomial expression that represents the area of the squash field if $x = 4$ and $y = 8$. What unit would the area of Bob's squash field have?

$$A = 4xy = 4(4)(8) = 128 \text{ sq. units}$$
